Profile Summary

Hands-on QA Automation Team Lead with nearly 4 years of progressive experience in building test infrastructures, leading QA engineers, and implementing robust automation strategies across Web, API, and DB layers. Expert in designing frameworks from scratch in both C# (.NET) and JavaScript (Playwright), mentoring team members, and ensuring full product quality ownership. Strong collaborator across R&D, DevOps, and Product teams, with a focus on scalable and maintainable test solutions.

Core Skills

- - Languages & Frameworks: C#, JavaScript, Playwright, Selenium, NUnit, TestNG
- - Automation Types: Web UI, REST API, DB Validation
- - Infrastructure: Page Object Model, Test Suites, Version Control (Git)
- - DevOps Tools: Azure DevOps, Jenkins, Git, CI/CD basics
- - Databases: SQL (Teradata), MongoDB
- - Test Management: Jira, Xray, Agile Methodologies
- - Leadership: Team mentoring, task planning, code reviews, cross-team collaboration

Professional Experience

QA Automation Team Lead | Guideline (Hashavim)

Sep 2023 – Present | Petah Tikva

- Built automation test infrastructure for a multi-module platform using C# and later migrated it to Playwright (JS).
- Lead 2 engineers, providing mentorship, reviews, and hands-on support.
- Defined full test strategy including UI, API, DB layers; coordinated with Dev/DevOps/Product.
- Resolved Git conflicts, managed test cycles, and maintained pipelines in Azure DevOps.

Automation Developer | Qualitest (Bank Hapoalim Project)

Jan 2022 – May 2023 | Tel Aviv

- Developed test automation for backend microservices (API) and web frontend.
- Used Postman, ReadyAPI, MongoDB and Teradata for validation.
- Built Selenium automation and integrated it with Jenkins and CI pipelines.
- Managed tasks and defects in Jira and Xray; operated under Agile methodologies.

QA Tester | Align Technology

Jan 2017 – Jan 2019 | Or Yehuda

- Conducted end-to-end, integration, and performance testing.
- Created and executed manual test cases using Jira and Quality Center.

QA & QC Technician | EMET E&M Computing

Jan 2016 – Jan 2017 | Rosh Ha'Ayin

- Conducted validation on Checkpoint firewall servers (hardware & software).
- Handled replacements and custom configurations per client requirements.

Education

Ariel Technological College | 2019 – 2021

Practical Software Engineering (2-Year Program)

Core Topics: Java, C#, JS, React, Angular, SQL, NoSQL, CRM

Languages

Hebrew: Native (C2)

English: Professional working proficiency (C1 – improving verbal fluency)
